zaheerpoei@gmail.com · +92 324 6159187 · [linkedin.com/in/zaheerahmed00](https://www.linkedin.com/in/zaheerahmed00)

Islamabad, Pakistan · Open to relocation (GCC)

PROFESSIONAL SUMMARY

Senior Android Engineer with 5+ years building and shipping production mobile apps, all live on Google Play. Specialized in Kotlin, Jetpack Compose, and Clean Architecture (MVI/MVVM) with multi-module design, secure data handling, and testable, maintainable code. Also delivers cross-platform features in React Native and collaborates closely with QA and product teams to ship reliable, user-focused applications.

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript, TypeScript, SQL, XML, Groovy | **Cross-Platform:** React Native (3 apps shipped)

Android & Architecture: Android SDK/NDK, Jetpack Compose, Jetpack (Room, WorkManager, Navigation, ViewModel, Flow), MVVM, MVI, Multi-Module, Clean Architecture, Hilt (DI), SOLID, Gradle (AGP)

Networking & Security: Retrofit, Kotlin Coroutines, RxJava, WebSockets (SignalR), SSL Pinning, Encryption/Decryption, OAuth2, Secure App Signing

Testing: JUnit, Espresso, Compose Test

Tools & DevOps: Android Studio, Git, GitHub, Azure DevOps, CI/CD Pipelines, Firebase (Analytics, Crashlytics, App Distribution), Postman, Swagger, Google Play Console

PROFESSIONAL EXPERIENCE

Senior Android Developer

May 2022 – Present

PackageX Inc.

Islamabad, Pakistan

- Led Android development for PackageX Receive as the primary engineer, owning the app's architecture and feature delivery end-to-end; the app is live on Google Play.
- Designed and built production apps on a multi-module Clean Architecture (MVVM/MVI) foundation, keeping features isolated and the codebase maintainable as scope grew.
- Developed features in Kotlin and Jetpack Compose using Jetpack libraries (Room, WorkManager, Navigation, Flow), with a focus on performance and a smooth user experience.
- Implemented secure networking with SSL pinning and data encryption to protect sensitive business and customer information.
- Delivered three React Native applications alongside native Android work, contributing across the company's mobile portfolio.

Senior Android Developer

Aug 2021 – Apr 2022

App In Snap Pvt Ltd

Islamabad, Pakistan

- Developed Android applications using MVVM and modern Android best practices.
- Applied Clean Architecture to improve code quality, testability, and scalability.
- Delivered maintainable, Kotlin-based applications aligned with business requirements.

Android Developer

Nov 2018 – Jul 2021

Whizpool Technologies

Islamabad, Pakistan

- Built Android applications in Java and Kotlin across a range of client projects.
- Collaborated directly with clients and internal teams to gather requirements and design UI.
- Migrated legacy projects from Java to Kotlin, improving code safety and maintainability.

SELECTED PROJECTS

- PackageX Receive** | *Kotlin* — Package receiving and tracking app for business mailrooms; led Android development. Live on Google Play.
- PackageX Mailroom** | *Kotlin* — Modern solution for managing business mailrooms end-to-end. Live on Google Play.
- Building Logistics** | *React Native* — Automates package receiving across mailrooms, warehouses, and dark stores with locker integrations.
- GenixDrive** | *Kotlin* — Driver app combining real-time tracking, social connectivity, multimedia, and rewards to encourage safer driving.
- SalonToday** | *Java* — Online salon booking portal for 24/7 appointments, with daily offers and promotions.

EDUCATION

B.Sc. in Computer Science — COMSATS University Islamabad

Mar 2012 – Mar 2016
